INDUSTRY COLLABORATION

U.S. recycling industry united on goal of addressing key industry issues

Improving quality of the recycling stream and increasing demand for recyclables in the manufacture of new products focus of industry collaborative

July 11, 2018

In May, a group of organizations representing various segments of the recycling industry met to discuss ways to better collaborate to advance the industry as a whole. The initial meeting, which took place in Washington, DC, at the headquarters of the [Institute of Scrap Recycling Industries](#), was an open discussion aimed at identifying ways throughout the recycling stream to improve quality, increase demand for material, and promote products made with recycled content.

As part of the initial phase, the organizations have released the following statement of cooperation:

COMPANY INFO

Institute of Scrap Recycling Industries (ISRI)

1615 L Street, NW, Suite 600
Washington , DC
US , 20036

Website: www.isri.org

The Institute of Scrap Recycling Industries, Inc. (ISRI) is the Voice of the Recycling Industry. ISRI represents approximately 1,300 companies in 21 chapters in the U.S. and 34 countries worldwide that process, broker and consume scrap commodities, including metals, paper, plastics, glass, rubber, electronics, and textiles. With headquarters in Washington, DC, ISRI provides education, advocacy, safety and compliance training, and promotes public awareness of the vital role recycling plays in the U.S. economy, global trade, the environment, and sustainable development. Generating more than \$105 billion annually in U.S. economic activity, the scrap recycling industry provides nearly half a million Americans with good jobs.

"As representatives of the complete recycling chain, we understand that improving the quality of the recycling stream and increasing the demand for recyclables in the manufacture of new products will deliver economic and environmental benefits nationwide. We commit to actively engaging with one another to enhance the nation's recycling systems, while simultaneously continuing our own organizations' work to influence change."

The groups have scheduled a meeting in August to determine specific courses of action and efforts to work on collectively.

Organizations participating in the effort include:

- American Forest & Paper Association
- AMERIPEN
- Association of Plastic Recyclers
- Institute of Scrap Recycling Industries
- Keep America Beautiful
- Northeast Recycling Council
- National Recycling Coalition
- National Waste & Recycling Association
- Plastics Industry Association
- The Recycling Partnership
- Southeast Recycling Development Council
- Sustainable Packaging Coalition
- Solid Waste Association of North America.

"Rolling Out the Recycling Red Carpet – 2018 RCA Conference"

"The Recycling Council of Alberta (RCA) 2018 Waste Reduction Conference "Rolling Out the Recycling Red Carpet" will be held September 19-21, 2018 at The Banff Centre for Arts and Creativity in Banff, Alberta. This conference offers an exciting and progressive array of current topics and high quality speakers, including keynote speaker Glen Murray, Executive Director of the Pembina Institute and former Environment Minister in Ontario, where he championed Extended Producer Responsibility and the Circular Economy. Sessions cover topics ranging from legal issues to international programs and an EPR bearpit. An interesting choice of tours helps to round out a very comprehensive waste reduction learning experience in one of the world's most beautiful and inspiring locations. Join your waste reduction peers in Banff at this premier waste reduction event. Program updates, registration information, and other details are now available on the conference web site. Be sure to come back to this site often - the program will continue to be updated as speakers, sessions, and other feature events are confirmed."

Sweden-based Enviro signs MoU with Treadcraft on tire recycling plant in Buffalo

July 4, 2018

[Scandinavian Enviro Systems AB \(Enviro\)](#) has signed an MoU (Memorandum of Understanding) with Treadcraft Limited to establish a new recycling plant in the city of Buffalo, New York. The contracting party, Treadcraft Limited, based out of Wainfleet, Ontario, was incorporated in 2007, and is today active on the North American market. According to Sweden-based Enviro the agreement is valid for a period of 6 months and applies to a recycling plant of minimum 30,000 tonnes of end-of-life tyres per year, and the project has great support from both the State of New York and the city of Buffalo. The ambition is to start the project at the end of this year, according to Thomas Sörensson, CEO of Enviro.
