

NERC's Sustainable Materials Management Consulting Services

The Northeast Recycling Council (NERC) is a nationally recognized leader in sustainable materials management for the public and private sectors. It boasts a 30 year history of innovative and effective research, program design and implementation, public education, and public-private dialogue. NERC's outstanding [staff](#) are expert in a wide range of topics, including source reduction, reuse, recycling, composting and organics management, and green procurement.

PROJECT MANAGEMENT

- **Providing Technical Assistance** - customized hands-on, directed assistance to affect long-term change.
- **Providing Trainings, Workshops, & Webinars** - developing and delivering innovative and effective trainings, workshops, and webinars.
- **Developing Educational Materials** - guidance documents, best management practices, case studies, and other tools.
- **Designing & Facilitating Multi-Stakeholder Dialogues** - organizing and leading efficient and effective group discussions resulting in consensus outcomes.
- **Developing Materials Management Programs** that address targeted issues and best management practices while engaging key stakeholders.
- **Recycling Business Development** - reviewing business plans and providing technical assistance for the development of financing plans and partnership building.
- **Promoting Recycling Market Development** – organizing material-specific webinars and workshops, developing and maintaining a recycling business database, developing regional recycling fact sheets and reports, and engaging in discussions with industry and government.
- **Conducting Research & Assessment** - gathering information, conducting analysis, engaging key stakeholders, and identifying key concerns and solutions.
