Market Resources for Recycling Industries

INTRODUCTION

Market Resources for Recycling Industries is a comprehensive compendium of Web-based resources that support the recycling industry. This reference tool is intended to save recycling entrepreneurs time in identifying available markets for recyclable materials. The document includes listings of brokers, collectors, processors, end-users, recyclers, and material recovery facilities.

If you find any errors or omissions, please let us know so we can make the correction: info@nerc.org.

ABOUT NERC

The Northeast Recycling Council, Inc. (NERC) is a regional non-profit organization that leverages the strengths and resources of its member states to advance an environmentally sustainable economy in the Northeast by promoting source reduction, reuse, recycling, composting, and the purchasing of environmentally preferable products and services.

NERC accomplishes this task by working with state agencies, trade associations, and other interested parties. NERC's members are state recycling and economic development agencies, as well as solid waste authorities. Advisory members include utilities, trade associations, private businesses, state and regional recycling organizations, consultants, and other interested parties. NERC is the only forum in the Northeast for cooperative research, collaborative action, and networking on regulatory, market and business development issues that link recycling and economic development.

NERC BUSINESS RESOURCES

NERC publishes and makes available a wide range of resources that support recycling market development. The NERC Website (www.nerc.org) is regularly updated with new tools and documents. Announcements about new postings are always announced in the monthly NERC Email Bulletin.

Email Bulletin

The Bulletin is a monthly email newsletter that provides information about NERC's activities, publications, and updates about state recycling and recycling market development programs. To receive the Email Bulletin, send an email to Lynn Rubinstein (lynn@nerc.org). Please be sure to include your full name and organization. A complete archive of past Bulletins is available on the NERC Website at http://www.nerc.org/documents/bulletin_archive.html.

Reports & Publications

NERC has published many reports and documents that support recycling and recycling markets. The complete, and up-to-date, list is available at <http://www.nerc.org/documents/index.html>. Currently, there are 28 unique resources included for recycling market development and many more for source reduction and recycling in general.

Regional Conference & Workshop

NERC holds a regional conference and a workshop every year. These focus on recycling market development. Upcoming events, past agendas, and PowerPoint presentations from all conferences and workshops are all available on the NERC Website at <http://www.nerc.org/conferences/index.html>.

State Agency Program Contacts

A complete list of state agency program contacts for specific commodity areas is available.

- **Connecticut** <http://www.nerc.org/documents/recycling/contact-ct.html>
- **Delaware** <http://www.nerc.org/documents/recycling/contact-de.html>
- **Maine** <http://www.nerc.org/documents/recycling/contact-me.html>
- **Massachusetts** http://www.nerc.org/state_information/massachusetts.html

State Recycling Organizations Directory

A directory, with Web links, of the State Recycling Organizations in the Northeast is on the NERC Website at <http://www.nerc.org/documents/recycling/index.html>.

[Back to Top](#)

WEB-BASED RECYCLING MARKETS DIRECTORIES

A comprehensive directory of the recycling industry—from collection through end-users—that serves New York and the Northeast region is available: The New York State Recycling Markets Database (<http://appcenter.nylovesbiz.com/esdrecycling/>). This Database, which is maintained by NERC, is an online, searchable database of recycling markets. It includes information from collection through end-users.

The New York Recycling Markets Directory *should be a first stop* for anyone trying to locate brokers, collectors, Materials Recovery Facilities (MRFs), processors, and recyclers.

The following table provides links to Web-based directories and listings that identify brokers, collectors, processors, end-users, recyclers, and MRFs. These directories cover many material areas. In the table, the directories that cover a variety of materials are identified as “multiple.” The categories included in the table below are:

- Multiple
- Antifreeze
- Batteries
- Batteries & Cell Phones
- Construction & Demolition
- Electronics
- Ferrous Metals/Steel
- Glass
- Mercury, Ballasts, CFLs
- Non-Ferrous Metals
- Organics
- Paper
- Plastic
- Propane Tanks
- Textiles
- Used Oil

The table is organized by material type, focus area served, and the types of recycling businesses and activities reflected in the directory. While many resources are focused on one or more states, rarely will the markets identified within that document be unique to the state in question. Rather, the document was prepared *on behalf of* that state or region.

The definitions used in the table are as follows:

- **Brokers** are individuals, organizations, or companies who act as agents in the marketing of recyclables, for a fee or commission. Brokers negotiate a price for the materials and set up transportation to a buyer. They are not processors.
- **Collectors** are businesses or public sector sites that collect recyclables but may or may not process the materials, or sites that accept recyclable materials.
- **Processors** are those that transform materials into finished materials.
- **End-users** are companies that use recyclables as a raw material (feedstock) to make new products, or to supply a raw recycled material to another end-user.
- **Recyclers** are loosely defined as collectors, handlers, or processors of various materials.
- **Materials Recycling Facilities (MRFs)** are processing facilities where recyclables (typically paper, glass, metal, and plastics) are sorted and baled before being marketed to industries which use recycled materials.

By being included in this list, NERC makes no warranties, recommendations, or representations about the organization or company, and solely intends to provide an informational service.

PUBLICATIONS

In addition to the directories listed above, the recycling industry has a wide array of print and online publications. Recycler's World (<http://www.recycle.net/pub/>) maintains an online listing of these publications.

Some significant publications include:

BioCycle Magazine (<http://www.jgpress.com/current.html>): "Published since 1960, BioCycle is America's foremost magazine on composting and organics recycling. BioCycle shows you how to turn organic residuals — woody materials, yard trimmings, municipal solid waste (MSW), food residuals, biosolids, manure and other feedstocks into value-added products."

The JG Press, Inc.
419 State Avenue, Emmaus PA, 18049
Phone: 610-967-4135, ext.22

Container Recycling Institute Newsletter

<http://www.container-recycling.org/publications/newsletters.htm>

"CRI's quarterly newsletter contains current information on states, provinces and countries considering new or expanded bottle bills, as well as other current information on container and package recycling."

Container Recycling Institute
4361 Keystone Ave., Culver City, CA 90232
310-559-7451

E-Scrap News

http://www.resource-recycling.com/esn_mag

E-Scrap News is published quarterly as a print magazine with weekly email newsletters. "Each issue of the quarterly magazine features the latest industry, market, and legislative news, directories of responsible e-scrap operators and in-depth features written by the leaders of the industry. E-Scrap News is the definitive source for marketing new equipment and services, contacting buyers and sellers, and keeping up to speed on the latest developments in this fast-paced environment."

Managing Editor, Henry Leineweber (henry@resource-recycling.com)
Resource Recycling
P.O. Box 42270, Portland, OR 97242-0270
(503) 233-1305

Paper Stock Report

<http://www.recycle.cc/psrpage.htm>

This is a bi-weekly newsletter that covers the markets for recovered scrap paper, including current market prices paid by dealers/processors and paper mills.

Plastics Recycling Update

http://www.resource-recycling.com/pru_mag

“Plastics Recycling Update, published quarterly, is the only magazine in North America focusing exclusively on polymer recovery efforts. . . the periodical is a superb source for marketing recycling equipment and services and offers an excellent means of sourcing new suppliers of recovered plastics. The journal is sent to all scrap plastic generators, reclaimers and end-users in the U.S. and Canada, with the winter edition also distributed at the annual Plastics Recycling Conference.” A weekly email newsletter update is provided as well.

Scrap Tire News

<http://www.scrap tirenews.com/>

“For 25 years, Scrap Tire News has provided the latest news and in-depth reporting on scrap tires and scrap rubber. Our targeted focus on the recovery, recycling, reuse and proper disposal of scrap tires and scrap rubber has positioned Scrap Tire News as the most respected source of tire and rubber recycling information worldwide. Each issue of this monthly publication features the latest market, equipment, product, research and legislative news. Over the past decade, Scrap Tire News expanded coverage of non-tire rubber scrap materials and established itself as the portal for tracking developments in the generation and recycling of both tire and non-tire rubber materials.”

REGIONAL RECYCLING MARKET DEVELOPMENT ORGANIZATIONS

Mid-Atlantic Consortium of Recycling and Economic Development Officials (MACREDO)

<http://macredo.org/>

MACREDO is an organization of recycling and economic development interests of the states of Delaware, Maryland, Pennsylvania, Virginia, West Virginia, and the District of Columbia. The organization's mission is to identify, promote, and implement projects and programs that enhance recycling and economic development opportunities on a regional basis. It is managed by a staff person in the offices of the Institute of Local Self Reliance (ILSR).

Linda Knapp, Executive Director

lknapp@netreach.net

Institute of Local Self Reliance

ADDITIONAL RESOURCES & TOOLS

EPA's Comprehensive Procurement Guidelines (CPG)

(<http://www.epa.gov/epawaste/consERVE/tools/cpg/index.htm>) provides the federal comprehensive procurement guidelines relating to purchasing recycled-content products. It also has links to federal programs and Executive Orders, as well as product fact sheets and supplier information.

JTR Professional Recyclers Network

<http://groups.yahoo.com/group/JTRProfessionalRecyclersNetwork/>

JTR is a listserv on Yahoo!Groups offered by the U.S. Environmental Protection Agency. The listserv discussions regard all aspects of recycling including collection, processing, manufacturing, and products with recycled content. There are approximately 250 subscribers. It is open to professional recyclers only (this includes officials in state and local governments, recycling businesses, university researchers, and consultants in the recycling industry), and allows them to share insights and seek advice on problems and issues facing recycling programs in their states and regions.

Mike Giuranna

Giuranna.mike@epa.gov

Kent Foerster

Foerster.kent@epa.gov

Materials Exchanges in the Northeast

(http://www.nerc.org/documents/material_exchanges_in_the_northeast.html) is a NERC resource that provides a listing of Materials Exchanges serving the Northeast states. Materials Exchanges are an opportunity to save money on purchasing or disposing of items. Organizations with surplus materials or reusable equipment can link with others in need of the materials. Some exchanges are non-profit and others are for-profit. Some have physical locations, while others are in cyberspace.

The National Recycling Coalition (NRC)

<http://www.nrcrecycles.org/>

“The NRC is a national non-profit advocacy group and a professional membership organization. The Coalition represents and advocates for every sector of the recycling industry across the country.”

1220 L Street, NW, Suite 100-155, Washington, DC 20005

Phone: 202-618-2197

info@nrcrecycles.org

Pennsylvania Recycling Markets Center (PARMC)

<http://www.parmc.org/>

Organized as a non-profit 501(c)(3) corporation, the Pennsylvania Recycling Markets Center is a leader in developing and expanding recycling markets in Pennsylvania. In a competitive global marketplace, the RMC is the keystone clearinghouse of environmental, economic development, and manufacturing resources for end use support of recycled commodities and products. The RMC is headquartered at Penn State Harrisburg with satellite offices near Pittsburgh. The Mission of the RMC is to expand and develop more secure and robust markets for recovered (recycled) materials by helping to overcome market barriers and inefficiencies.

Bob Bylone, Executive Director

rjb128@psu.edu

Penn State Harrisburg, 777 West Harrisburg Pike, Church Hall, Third Floor,
Middletown, PA 17057-4898

Salt Lake City, Utah 84158, USA

Phone: (801) 531-0404

Reuse Alliance

<http://www.reusealliance.org>

The “Reuse Alliance is a national [501(c)3] nonprofit that is working to increase awareness of reuse by educating the public about its social, environmental and economic benefits. We envision a world where people are actively engaged in the reuse movement and as a result have created a cleaner environment and a greener economy for their communities.”

Phone: 301-887-3873

<http://www.reusealliance.org/connect/contact-us>

Reuse Development Organization, Inc. (ReDO)

<http://www.redo.org/>

“ReDO is a national and international tax exempt, 501(c)(3) non-profit organization promoting reuse on every level. ReDO was created to fill an informational void identified at a February 1995 conference on reuse, where participants voiced a desire to avoid "reinventing the wheel" and share what they had learned. ReDO's mission is to promote reuse as an environmentally sound, socially beneficial and economical means for managing surplus and discarded materials.”
