INTRODUCTION

For any New Hampshire business, the proper disposal of hazardous waste can be a significant expense. Fortunately for businesses generating small amounts of hazardous waste, a Small Quantity Generator (SQG) hazardous waste collection in conjunction with a municipal Household Hazardous Waste (HHW) collection program can be an affordable, environmentally - sound disposal option. By participating in these programs, businesses pay only to dispose or recycle their hazardous waste and are spared the expensive set up, handling and transportation fees charged by hazardous waste haulers.

The purpose of this Guide is to be a starting point for understanding municipal household hazardous waste collection programs. The Guide is divided into four sections:

1. Questions a business should ask before using a municipal Household Hazardous Waste/Small Quantity Generator (HHW/SQG) collection project.
2. Listings of New Hampshire municipal Household Hazardous Waste/Small Quantity Generator collection projects.
3. Directory of hazardous waste vendors servicing New Hampshire businesses.
4. Other resources for properly managing hazardous waste.

In addition, the Guide provides businesses with an introduction to basic hazardous waste terminology in order to facilitate an understanding of state and local requirements and to use as a foundation for developing questions related to hazardous waste disposal. Please note: The information provided in the Guide is not intended to take the place of the actual regulations.

- IMPORTANT -

For questions on hazardous waste compliance and to confirm the information in this Guide is current, **contact the New Hampshire Hazardous Waste Assistance Hotline at 603-271-2942.**

I. QUESTIONS A BUSINESS SHOULD ASK BEFORE USING A MUNICIPAL HAZARDOUS WASTE COLLECTION PROGRAM

How Does A Municipal HHW/SQG Collection Work?

The purpose of a Household Hazardous Waste/Small Quantity Generator collection event is to provide Small Quantity hazardous waste Generators (SQGs) a convenient, economical alternative to the traditional disposal method utilizing a hazardous waste hauler. By self-transporting their hazardous wastes to a Municipal Household Hazardous Waste (HHW) collection event, the SQG avoids the costs a hazardous waste hauler charges to travel to the SQG's place of business, complete the paperwork, package the waste and transport it to a disposal site.

In a municipal HHW/SQG collection event, the SQG self-transportes up to 55 gallons of their hazardous waste to the location where a Household Hazardous Waste collection event is taking place. Because the event uses a licensed hazardous waste hauler who is already on location and set up to accept hazardous waste, the SQG can "pass off" their waste to the hauler. At this type of event, SQGs are generally given a specific time period, generally before or after the household collection portion of the event, to bring in their wastes, allowing the hauler to concentrate only on serving the SQGs. Before the event, the SQG must obtain the approval of the municipality and register with the hauler so each party knows what wastes will be transferred, and the SQG knows what his disposal costs will be.

Essentially, the municipality covers the cost for the hauler to travel to the site, provide personnel and set up equipment. The SQG saves not only those costs, but realizes savings by packaging their own wastes, completing their own paperwork and sharing the transportation costs to the disposal site with other SQGs who participate. Theoretically, the hauler saves money because the SQG packages the waste and the hauler can accept numerous SQGs' wastes without expending the time and resources to travel to each SQG location.

What is a hazardous waste?

Every business is responsible for its waste, whether it is solid waste or hazardous waste. The following is a list of wastes that would be considered hazardous in New Hampshire:

Characteristic Hazardous Wastes:

- Ignitable (easily catches fire, flash point of less than ~ 140°F),
- Corrosive (materials that etch metal and burns human flesh; liquid with a pH of less than 2 or greater than or equal to 12.5),
- Reactive (explosive, reacts violently when mixed with water), and/or
- Toxic

Listed Hazardous Wastes:

Acutely hazardous wastes listed by EPA and found in Env-Wm 402.04
Toxic hazardous wastes listed by EPA and found in Env-Wm 402.05
Generic industrial process wastes listed in Env-Wm 402.06
EPA listed process wastes listed in Env-Wm 402.07

-IMPORTANT-

Some wastes are excluded from regulation under the NH Hazardous Waste Rules. For example, sand or absorbents used to clean up a small gasoline spill are not considered hazardous wastes and do not “count” toward generator status. Exemptions are listed in Env-Wm 401.03. **For information on specific wastes that are considered hazardous, call the NH Hazardous Waste Assistance Hotline at 271-2942.**

Is my business considered a Small Quantity Generator?

A Small Quantity Generator (SQG) is any business that creates, in any calendar month:

Less than 100 kilograms or 220 pounds of hazardous waste;
One kilogram or 2.2 pounds of an acutely hazardous waste; and
100 kilograms or 220 pounds of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill of any acutely hazardous waste.¹

For comparison purposes, ½ of a 55-gallon drum filled with water weighs about 229 pounds, and five 55-gallon drums of water weigh about 2,293 pounds.²

There are two tools readily available to help determine if the waste your business generates is hazardous or not - the product label and the Material Safety Data Sheet (MSDS). Chemical vendors and manufacturers are required by federal law to furnish an MSDS for each chemical and product sold.

-IMPORTANT-

Universal Wastes (fluorescent lamps, mercury-containing devices, batteries, antifreeze, Cathode Ray Tubes and some pesticides) are exempt from the more burdensome requirements of the NH Hazardous Waste Rules. You may self-transport these wastes any time, and deliver them directly to a recycler or disposal site using a Bill of Lading, not a manifest. **For information, call the New Hampshire Pollution Prevention Program at 603-271-2956.**

¹ NH Hazardous Waste Rules, Env-Wm 110 (c).

² Vermont Agency of Natural Resources, Department of Environmental Conservation, *Conditionally Exempt Generators Handbook, A Guide to Hazardous Waste Management*. July 1999, page 6.

Where may Small Quantity Generators transport their hazardous wastes?

SQGs may self-transport up to 55 gallons of their hazardous wastes to:

- 1) An off-site authorized treatment, storage or disposal facility;
- 2) A municipal HHW collection program where SQG wastes are accepted. Refer to Section II of this Guide, to find out if the town your business operates in allows SQG collections at their HHW event; or
- 3) Another site owned and operated by the SQG (under certain circumstances) for later disposal.

What types of hazardous wastes may a Small Quantity Generator transport to a municipal HHW/SQG event?

Any waste normally picked up from the SQG's site by a licensed hazardous waste hauler may be transported to a HHW/SQG collection project. These include any of the characteristic or listed wastes. Wastes not normally accepted are: explosive, medical, radioactive or infectious wastes. You will have to obtain the hazardous waste hauler's approval to bring the waste to the event, so you'll have to check with them first, anyway.

What are the transportation requirements?

As the generator of the waste, SQGs are responsible for ensuring that their hazardous wastes are properly packaged and transported safely to the collection site. The U.S. Department of Transportation (DOT) has established regulations for the transportation of hazardous waste that are required by the NH Hazardous Waste Rules. These are common sense requirements (see below). When you contact the hazardous waste hauler, they can tell you how to package particular wastes. You should also check with your insurance company to make sure your policy covers self-transportation.

The following are NH Hazardous Waste Rules requirements for packing and transporting hazardous waste:

Manifest – SQGs are required to fill out a standard manifest form for the hazardous waste they transport. A sample manifest form and instructions may be downloaded from http://www.des.state.nh.us/rims/rims_forms.htm under manifest.

Packing – NH Hazardous Waste Rules refer to DOT requirements:

- Use the original container or a container in good condition,
- The container must be compatible with the contents,
- Incompatible wastes may not be stored in the same container, and
- The container must be sealed and secured to prevent spills.

Labeling – All containers used for hazardous waste must be clearly labeled. See Figure 1 for a sample label.

Hazardous Waste

State and Federal Law Prohibits Improper Disposal

EPA ID No:
Contents, Composition:

Figure 1. Sample Hazardous Waste Label

What does a Small Quantity Generator need to do prior to participating in a municipal HHW/SQG event?

SQGs may use the following checklist when preparing to use a municipal HHW collection program.

- Inventory all waste and determine which are hazardous.
- If you don't already have one, obtain an EPA ID number by contacting the NHDES Waste Management Division at 271-2901.
- Contact the municipal household hazardous waste coordinator to **obtain their approval to participate**. (Refer to Section II of this Guide for the HHW program contact information for your town.)
- Pre-register with the hazardous waste hauler and schedule your drop off time** for the collection event.

-IMPORTANT-

A new State law requires all Small Quantity Generators to provide DES a signed, completed self-certification checklist indicating the SQG's compliance with environmental regulations. Certification forms are being mailed on a 3-year, rotating basis.

For information, call the NH Hazardous Waste Assistance Hotline at 603-271-2942.

- Fill out a manifest for hazardous wastes to be transported.

- Prepare the wastes for transportation.

What will it cost to participate in the HHW program?

QGs will pay the hazardous waste hauler directly for the handling and disposal charges, based on the amount and type of wastes. The total cost and method of payment should be established when the SQG registers with the hauler prior to the event. There is usually no charge from the municipal program for an SQG to participate in an HHW/SQG collection event. By self-transporting their allowable wastes to an event, SQGs also save on pickup costs that are normally charged.

II. NEW HAMPSHIRE MUNICIPAL HOUSEHOLD HAZARDOUS WASTE COLLECTION PROGRAMS THAT INCLUDE SMALL QUANTITY GENERATOR COLLECTIONS

(Programs listed from North to South.)

<i>Town</i>	<i>Agency/Department Phone</i>	<i>Collection Frequency</i>	<i>Cost</i>

III. HAZARDOUS & UNIVERSAL WASTE VENDORS DIRECTORY

The list of hazardous waste vendors is ever changing. This Hazardous and Universal Waste Resource Directory provides a listing of vendors that accept various hazardous and universal wastes generated at your business as of February 2004. To use, look for the waste you need to properly dispose at the top row and find a ● to find the corresponding vendor who will accept your particular waste. Complete contact information on all vendors is listed alphabetically below. Another resource for properly disposing of hazardous waste is the Municipal Collections for Small Quantity Generators (SQGs) in Section II of this Guide.

Are we missing any sources? Have you found any mistakes? Are you aware of any updates? Please let us know and we'd be happy to make the corrections and additions. Contact Mary Ann Remolador [maryann@nerc.org], Assistant Director, NERC.

Disclaimer: The Northeast Recycling Council, Inc. (NERC) does not believe this to be a complete list of available services, and by providing this list does not imply that the companies are in compliance with applicable laws. NERC does not endorse any specific program or business. NERC cautions all generators to make sure that the hazardous waste vendors they plan on using are in compliance with local, state, and federal requirements.

-IMPORTANT-

A complete list of registered hazardous waste transporters in NH can be obtained by contacting Tammy Calligandes of the Department of Environmental Services at 603-271-2048 or by email at tcalligandes@des.state.nh.us. See also the One Stop website to search or submit a query to view the entire list of registered transporters at http://www.des.state.nh.us/asp/onestop/Hazardous_Waste_Transporters_Query.asp

Product Notes:

Lead Acid Batteries includes: automobile batteries.

Rechargeable Batteries includes: Nickel Cadmium (Ni-Cd), Nickel Metal Hydride (Ni-MH), Lithium Ion (Li-ion), and Small Sealed Lead (Pb) weighing less than 2 pounds/1 kilogram.

Electronic Devices for Reuse: all units must be in working condition.

Hazardous Waste includes: a large variety of materials regulated under the New Hampshire Hazardous Waste Regulations, including petroleum.

Mercury Containing Devices includes: vendors that have drop boxes for used, wall-mounted Mercury Containing Thermostats.

Waste Oil includes: Various petroleum products - flammable/combustible hydraulic oil, used motor oil, PCB, degreasers, and oil/water emulsions and sludge.

Polychlorinated Biphenyls (PCBs) include: electrical equipment containing PCBs, PCB ballast recycling, PCB debris, PCB and non-PCB transformers.

Propane Tanks and Cylinders includes: 20-pound tanks and smaller.

Specific Company Information:

1. Also accepts all compressed common gas cylinders and fire extinguishers.
2. Exchange service, whereby company will recycle the antifreeze and sell it back to generator.
3. Computers only.
4. Collects spent batteries only from the customers they sell to and serves the northern New Hampshire area.
5. Some pick up minimums.
6. Dental mercury amalgam & lead foil only.
7. Company recycles reclaimed product.
8. Serves Connecticut River Valley.
9. Also accepts all compressed common gases.
10. Button batteries only.
11. Working or repairable computers and components only.
12. Newer working computers and components only.
13. Also accepts helium tanks, refrigerant containers, and fire extinguishers.
14. Small potable devices only: PDAs, cell phones, laptops, cameras, calculators and cordless tools.

Additional Vendor Lists:

The New Hampshire Department of Environmental Services maintains the following list of vendors:

- **Fluorescent Lamp & Ballast Recycling Facilities** [www.des.state.nh.us/SWTAS/lamplist.htm]
- **Propane Tank Vendors and Collection Companies** [[www.des.state.nh.us/SWTAS/propane tanks.htm](http://www.des.state.nh.us/SWTAS/propane_tanks.htm)].
- **Licensed Asbestos Abatement Contractors** [http://www.des.state.nh.us/SWTAS/asbestos_abatement.htm]
- Used Oil Analysis
- Used Oil Transporters

- Underground Storage Tank Closure Contractors
- **Waste Oil Marketers** [<http://www.des.state.nh.us/orcb/UOMList.pdf>]

The International Association of Electronics Recyclers maintains a list of CRT and electronic processors and reusers on their website at [www.iaer.org].

The Electronics Industry Alliance Consumer Education Initiative maintains a list of CRT and electronic recycling and reuse opportunities on their website at [www.eiae.org].

Additional **lamp recycling companies** are listed on the LampRecycle.org web site at [www.nema.org/lamprecycle/recyclers.html].

The Rechargeable Battery Recycling Corporation (RBRC) maintains a list of battery collection sites nearest you or to request a collection box for your place of business at [www.rbrc.org]

Additional **thermostat collection sites** nearest you may be found at [<http://www.nema.org/gov/ehs/trc/>] and click on “Find a Participating Wholesaler.”

ADDITIONAL HAZARDOUS MATERIALS REUSE OPTION

New Hampshire Materials Exchange (NHME)

WasteCap Resource Conservation Network

122 N. Main St., Concord, NH 03301

Phone: 603-224-1517, Fax: 603-224-2872

exchange@wastecapnh.org

reconinfo@wastecapnh.org

www.wastecapnh.org/nhme/

WasteCap's New Hampshire Materials Exchange links generators of a diverse assortment of unwanted materials with potential users of those materials. The NHME operates a listing of materials available and wanted by a wide range of users, including businesses, schools, and non-profit groups. This saves disposal costs for waste generators and purchasing costs for users.

The WasteCap Resource Conservation Network (ReCoN) is an initiative of the Business & Industry Association of New Hampshire, whose goal is to help businesses save money and conserve natural resources by providing free, confidential assistance in reducing solid waste, conserving energy and water, and preventing pollution.

ADDITIONAL RESOURCE

New Hampshire Small Business Development Center (NHSBDC)

Rivier College, 420 Main Street, Nashua, NH 03060

Phone: 603-897-8484, Fax: 603-897-8885

Contact: Andrea O'Brien, [aobrien@rivier.edu]

The New Hampshire Small Business Development Center is a business resource offered through the support of the University of New Hampshire, the Small Business Administration, the Department of Resource and Economic Development and the private sector. The NHSBDC offers free, one-on-one, business counseling for start up and established businesses alike. The SBDC's Compliance Assistance Program offers assistance in the environmental and workplace safety area.
